Tessuto con trattamento a protezione contro i liquidi  
Fabric with the liquids protection treatment

Questo tessuto è stato trattato con uno speciale repellente che respinge ogni tipo di liquido trasformandolo in goccioline che scivolano via. Le macchie liquide si asciugano facilmente con un panno o una spazzolata che rimuove facilmente lo sporco secco.

This fabric has been treated with a special repellent that repels any kind of liquid, changing it into droplets that slip away. The liquid stains easily wipe with a cloth or a brush that easily removes dry dirt.
